

Lesson 08 Demo 04

Use Device Designer

Objective: To use Tableau's device preview feature, which allows users to see how a dashboard will look on different displays, including phones, tablets, and desktop monitors

Tools required: Tableau Desktop

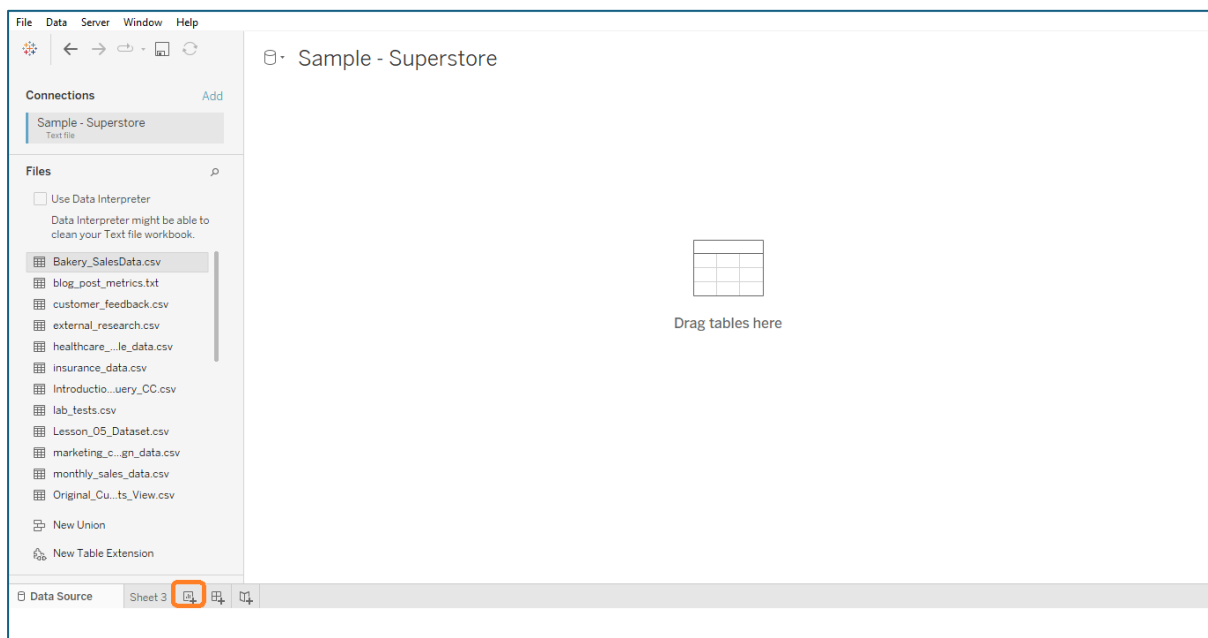

Prerequisites: None

Steps to be followed:

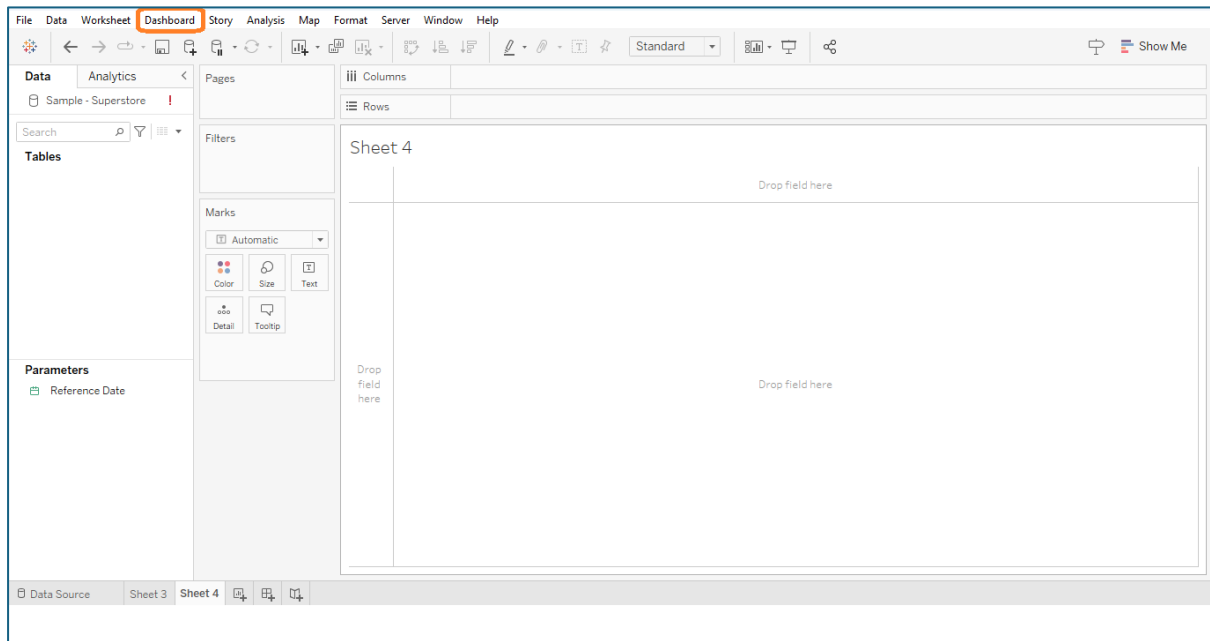

1. Open the **device preview**
2. Select the **device type** as Desktop

Step 1: Open the device preview

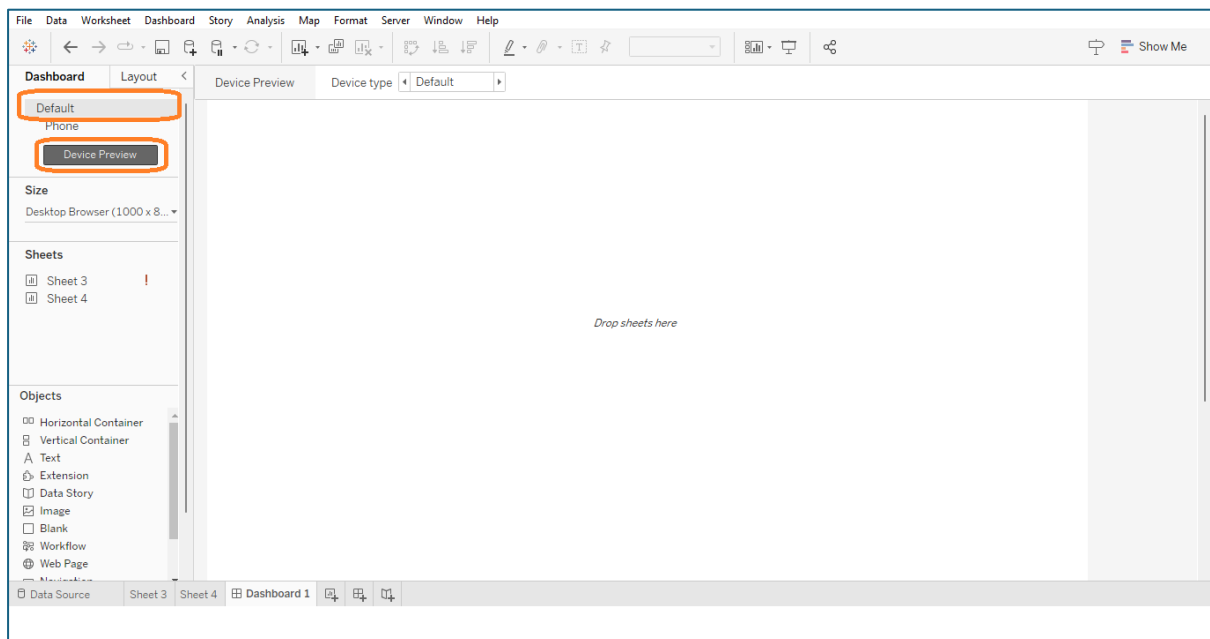

1.1 Open a new worksheet

1.2 Open a **New Dashboard**

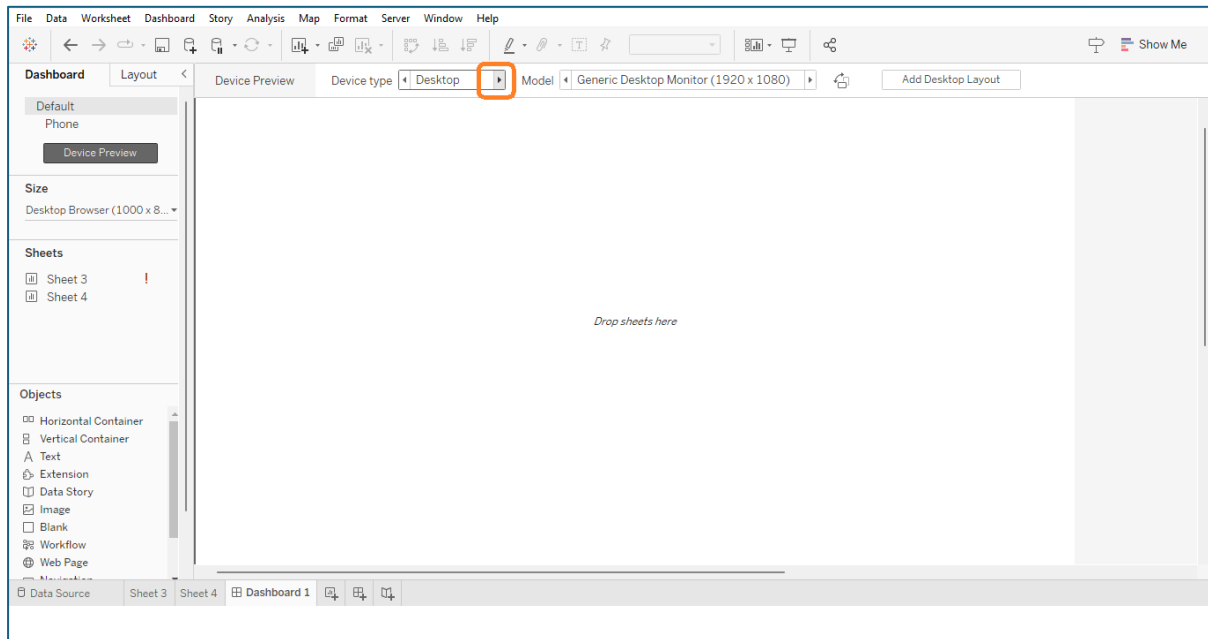

1.3 Click on device preview to open the device preview menu keeping **Default** as preview

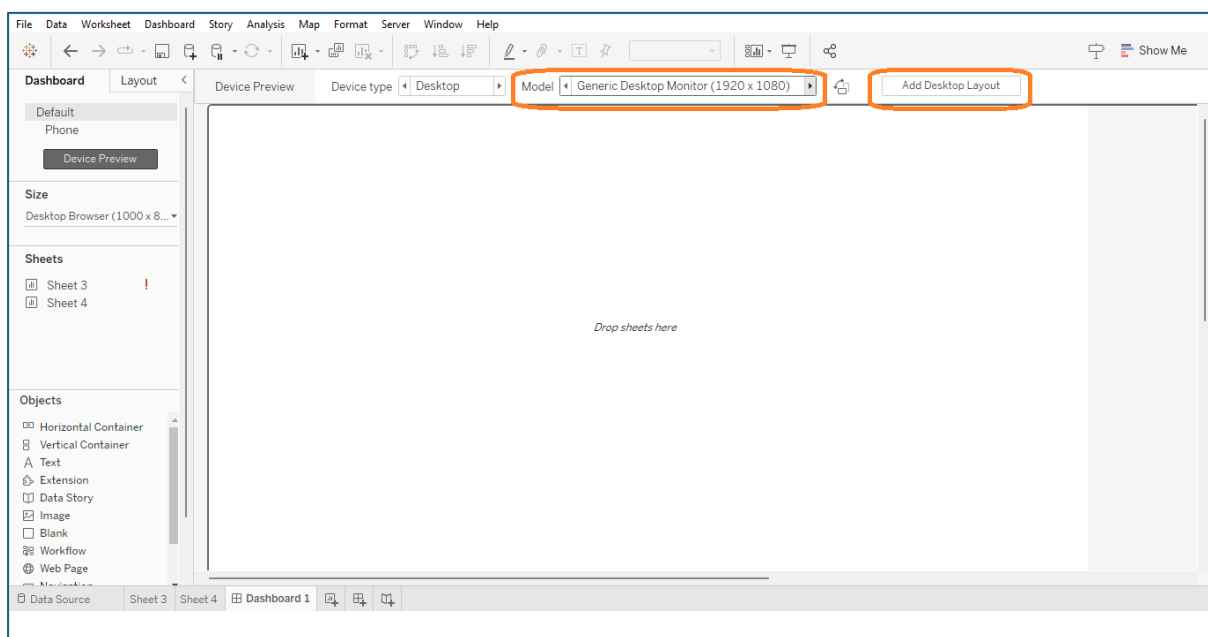

Step 2: Select the device type as Desktop

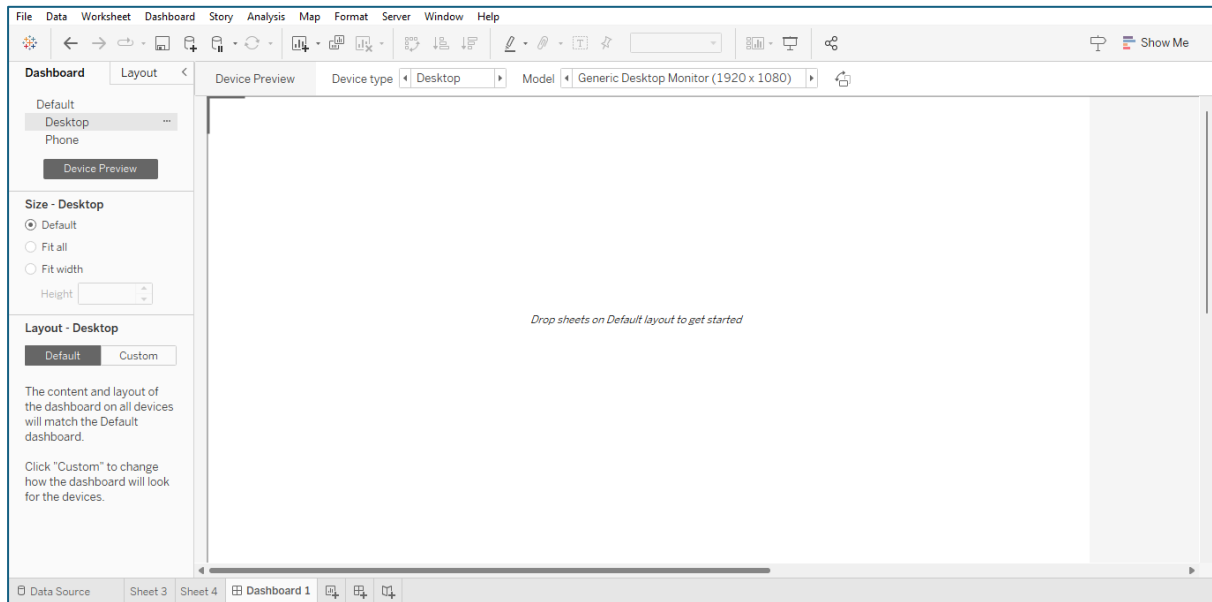

2.1 Use the side arrows to select the device type as **Desktop**

Note: If you select **Desktop**, the **Model** section will also open as below. Select **Generic Desktop Monitor** if you are not sure about your desktop model. Click on **Add Desktop layout** to confirm.

The output screen will look like:

You have successfully used Tableau's device preview feature, which allows users to see how a dashboard will look on Desktop display. Similarly, if you want, you can select Tablet or Phone.
